```

Problem 04:

Print all the following shapes(The height will always be an odd number)

```
*
***
*****
*******
*****
***
*
```

Problem 05:

Printing Pajama ☺

Write a Program which asks for 4 options menu:

Option 1: It Takes the Dimension and prints the following shape:

```
**********  **********
*********    *********
********      ********
*******        *******
******          ******
*****            *****
****              ****
***                ***
**                  **
*                    *
```

Option 2: It takes as parameter and prints the following Shape:

```
*                    *
**                  **
***                ***
****              ****
*****            *****
******          ******
*******        *******
********      ********
*********    *********
**********  **********
```

Option 3: It takes the appropriate parameters and Prints the following shape:

```
**********  **********
*********    *********
********      ********
*******        *******
******          ******
*****            *****
****              ****
***                ***
**                  **
*                    *
*                    *
**                  **
***                ***
****              ****
*****            *****
******          ******
*******        *******
********      ********
*********    *********
**********  **********
```

Note: Your program should take input from the user as Height H, and then print the shapes accordingly. 🐱

```
O===O
 \O/
