Quiz 10 **Roll number:** Solution

Write a C++ program which takes an integer number as input and print the below pattern.

Note : Use only two loops to implement this functionality.

Expected output:

```
Enter number : 5

*
* *
* * *
* * * *
* * * * *
* * * *
* * *
* *
*
```

```
# include <iostream>
using namespace std;
int main() {
```

⇒ 1 mark

```
int num;
cout << " Enter number : ";
cin >> num;
```

⇒ 1 mark

```
int iter = 1; ⇒ 1 mark
for (int i = 1; i > 0; i = i + iter) {
```

1 mark

~~2 marks~~ 1 mark

```
    for (int j = 1; j ≤ i ; j++) { ⇒ 2 marks
        cout << " * ";
    }
    cout << endl;
```

⇒ 1 mark

```
    if (i == num) {
        iter = -1;
    }
}
return 0;
}
```

⇒ 2 marks
