Quiz 6 Roll number: BSSE24001

1. **Write a program that asks a user to input four integers and prints the sum of first two integers, the product of the last two integers, the difference of first and third integers, the division of last integer with first integer and the average of all integers.**

```
#include <iostream>
Using name space std;
int main()
{
  int a,b,c,d, sum, product, difference, division;
  cout<<"Enter 1st number.";
  cin>>a;
  cout<<"Enter 2nd no.";
  cin >>b;
  cout<<" Enter 3rd number.";
  cin>>c;
  cout<<" Enter 4th no.";
  cin >>d;
  Sum = a+b;
  cout<<"Sum is"<< Sum;
  difference = a-c;
  cout << difference;
  product = c*d;
  cout << product;
  division = d/a;
  cout << division;
  int average;
  average = (a+b+c+d)/4;
  cout << average;
  return 0;

}
```
